Subject: Files to post to the ADEQ site

Kelly,

Starting today, until we stop air monitoring I will start sending you two files...

One is the summary report from EPA on the previous day's monitoring.. Please post this under the name "EPA Air Monitoring Report -- 04/05/2013" or something that you like...

The second is the actual data file, supporting the report... Please post this under the name "EPA Air Monitoring Data Files -- 04/05/2013" or something you like...

I will go back into the original file you posted and split the data files into individual dates and send to you... that would be much more manageable than the original file...

Thanks for all your help on this...

Attached is the first two files...
